

CYBERSECURITY & IT CONSULTANCY

Tony Link Technologies

Cybersecurity consulting, full-stack web development, cloud solutions and managed IT services — for businesses across Africa and internationally.

WHO WE ARE

Your trusted IT solutions partner.

Tony Link Technologies (Pty) Ltd is a registered South African cybersecurity and IT consultancy dedicated to building future-proof digital solutions — serving clients across Africa and internationally with a remote-first approach.

We are pioneers and passionate enthusiasts in the expansive universe of technological innovation. Our work spans the full lifecycle of a client's digital estate: securing it, building on it, moving it to the cloud and keeping it running.

Together, let's demystify the complexities of technology and harness its power to create an unprecedented future — where tomorrow's dreams are today's projects.

OUR MISSION

Innovation, excellence and impact.

Innovation at the Core

To be the architects of future-proof digital landscapes, continuously innovating and evolving with the rapidly changing tech sphere — delivering solutions that meet today's needs and anticipate tomorrow's.

Excellence in Execution

To set the standard in IT services through deep expertise, relentless dedication to quality and a meticulous approach to every project. Our goal is not just to meet expectations, but to exceed them — every time.

Pioneering Customer Success

To put our clients' success first with tailor-made solutions aligned to their goals and challenges — understanding each client's unique landscape and delivering impactful results.

VISION

Where we're headed.

To be the catalyst for transformation in the digital world, setting new benchmarks for excellence, innovation and sustainability in IT solutions. We envision a future where our technological achievements contribute to the success of businesses globally, fostering a digital ecosystem that thrives on creativity, efficiency and integrity.

VALUES

What we stand for.

01

Client Centricity

Our clients' needs and aspirations drive our actions. We are committed to understanding and aligning with our clients to deliver results that matter.

02

Innovation

We pursue innovation relentlessly, seeking new ways to inspire change and make a lasting impact in the technology landscape.

03

Integrity

We conduct our business with the highest standards of professionalism and ethical behaviour, ensuring trust and transparency in all we do.

04

Collaboration

We believe in the power of teamwork — within our organisation and in partnership with our clients — to achieve extraordinary results.

05

Sustainability

We prioritise sustainable practices in our operations and solutions, contributing to a better future for our planet and society.

06

Agility

We adapt rapidly to evolving client needs and market conditions, staying ahead of the curve in an ever-changing technology landscape.

WHAT WE DO

Our services.

Six practice areas covering the security, development, cloud and support needs of growing businesses — each scoped to your requirements and quoted transparently in ZAR or USD.

01 Cybersecurity Consulting

Audits, penetration testing, cloud hardening and ongoing security retainers.

- Security Audit
- Web / App Security Review
- Cloud & Network Hardening
- Ongoing Security Retainer

02 Full-Stack Web Applications

Custom web applications from MVP to enterprise scale, built with modern frameworks and best practice.

- MVP Application
- Business Systems (CRM, inventory, bookings, dashboards)
- Enterprise & Multi-tenant Applications
- API Integration
- Hourly Development & Code Review

03 Website Development

Professional website design and development — landing pages, business sites, e-commerce and maintenance.

- High-converting Landing Pages
- Business Websites (5–8 pages, CMS)
- E-Commerce Websites
- Security-first Web Development
- Website Maintenance

04 IT Support & Managed Services

Reliable IT support for small and medium businesses — hourly, monthly and retainer packages.

- On-demand Hourly Support
- Monthly IT Support for SMEs
- Business IT Retainer
- Microsoft 365 Setup
- Onsite Support Days

05 Cloud Solutions

Assessment, setup, migration and ongoing management across AWS, Azure and Google Cloud.

- Cloud Readiness Assessment
- Small Business Cloud Setup
- Enterprise / Scalable Cloud Setup
- Monthly Cloud Management

06 Specialised Security Services

Advanced, hands-on security engagements for specific risks and requirements.

- Penetration Testing
- Vulnerability Assessment
- API Security Testing
- Web Application Analysis
- Application Security Reviews
- Security & Compliance Audits
- Digital Forensics
- Reverse Engineering
- Network Security
- Cloud Security Consulting
- Data Encryption
- Security Tool Deployment
- Security Policy Development

RAPID DELIVERY FRAMEWORK

Full-stack business systems in 3 months.

We build production-ready, POPIA-compliant SaaS and business engines designed to scale with your organisation.

90-Day Production

Full lifecycle development, from architecture planning to live launch within 3 months.

10,000+ User Scale

PostgreSQL or NoSQL architectures built for high performance, concurrency and low latency.

POPIA Compliant

Strict privacy controls and encrypted handling of sensitive records, aligned with SA law.

PWA + Automation

Multi-screen Progressive Web Apps with n8n or Zapier workflow automation.

BUILT TO OPERATE

Engineered — not just deployed.

Spinning up infrastructure is the easy part. Every business system and enterprise application we build carries six differentiators from day one.

01

Engineered to Scale

Architecture designed for concurrent load and growth from the first commit, so performance holds as your user base grows.

02

Built-In Resilience

Redundancy, graceful degradation and recovery planned in — systems that keep running through failure.

03

Governance by Design

Access control, audit trails and data governance structured into the system, not bolted on later.

04

Cost-Optimised Infrastructure

Right-sized resources so infrastructure spend scales with actual usage, not guesswork.

05

AI-Ready Foundations

Clean data models and structured APIs, ready to plug into AI and automation workflows as needs evolve.

06

Security From Day One

Authentication, encryption and secure defaults considered at the architecture stage — not patched in after launch.

CORE TECH STACK

PostgreSQL / NoSQL · PWA · SaaS Architecture · POPIA Data Protection · n8n & Zapier

TRUSTED PARTNERS

Clients that currently trust us.

We're proud to support businesses across engineering, training, trading, automotive and refrigeration.
